

UI Design Checklist

Review typography, spacing, colors, layout, components, responsiveness, accessibility, and visual consistency before you deliver a design.

How to use: print this page or open it on a tablet, go through each screen, and tick an item only when it is actually done. Start with the Quick 10-Point UI Review if you are short on time.

Quick 10-Point UI Review

The highest-priority checks. Do these before you share any design.

- | | |
|---|--|
| ☐ 1. The primary action is obvious on every screen | ☐ 2. Headings are clearly different from body text |
| ☐ 3. Body text is 16px or larger on web and mobile | ☐ 4. Text contrast is at least 4.5:1 use a contrast checker |
| ☐ 5. Spacing follows one scale e.g. 4, 8, 16, 24, 32 | ☐ 6. Elements align to a grid no near-misses |
| ☐ 7. Same component, same style buttons, inputs, cards | ☐ 8. Every form field has a visible label |
| ☐ 9. Mobile layout is checked at 375px wide | ☐ 10. No spelling errors or placeholder text |

1. Layout & Grid

- ☐ Consistent page margins same outer margins on every screen
- ☐ Consistent grid e.g. 12 columns desktop, 4 mobile
- ☐ Proper alignment edges line up to columns
- ☐ Consistent spacing between sections and blocks
- ☐ Clear visual hierarchy the eye knows where to go first
- ☐ Content is easy to scan short blocks, clear headings
- ☐ Layout works across screen sizes

2. Typography

- ☐ Font family is consistent one or two typefaces max
- ☐ Heading hierarchy is clear H1 → H2 → H3 visibly differ
- ☐ Body text is readable 45–75 characters per line
- ☐ Font sizes are appropriate from a defined type scale
- ☐ Line height is comfortable about 1.4–1.6 for body
- ☐ Text contrast is sufficient
- ☐ Text styles are consistent use saved text styles

3. Colors

- ☐ Primary color is used consistently mainly for key actions
- ☐ Secondary colors are consistent
- ☐ Background colors are appropriate content stands out
- ☐ Text colors are readable on every background used
- ☐ Color contrast is sufficient 4.5:1 text, 3:1 UI elements
- ☐ Colors communicate states where necessary error, success, warning
- ☐ Avoid unnecessary colors stick to the palette

4. Spacing

- ☐ Consistent spacing system e.g. multiples of 4 or 8
- ☐ Consistent padding inside cards, buttons, inputs
- ☐ Consistent margins around sections
- ☐ Consistent gaps between components
- ☐ No unnecessarily crowded areas
- ☐ No excessive empty space

5. Buttons & Components

- ☐ Button hierarchy is clear primary, secondary, tertiary
- ☐ Button sizes are consistent
- ☐ Interactive states are defined hover, focus, pressed, disabled
- ☐ Components are reusable built as components, not copies
- ☐ Component styles are consistent
- ☐ Icons are consistent one icon set
- ☐ Form controls are consistent

6. Forms

- ☐ Labels are clear short and above the field
- ☐ Required fields are identified
- ☐ Placeholder text is not used as the only label
- ☐ Error states are clear say what went wrong and how to fix it
- ☐ Success states are clear
- ☐ Input fields are easy to use large enough to tap
- ☐ Form actions are obvious submit button clearly labeled

7. Images & Icons

- ☐ Images have appropriate resolution sharp, not pixelated
- ☐ Images are properly aligned
- ☐ Icons have consistent style outline or filled, not mixed
- ☐ Icons have appropriate size e.g. 16, 20, or 24px
- ☐ Decorative elements do not distract from content
- ☐ Images support the user task

8. Responsive Design

- ☐ Desktop layout checked e.g. 1440px
- ☐ Tablet layout checked e.g. 768px
- ☐ Mobile layout checked e.g. 375px
- ☐ Text remains readable
- ☐ Buttons remain usable tap targets about 44px
- ☐ Navigation works on mobile
- ☐ Content does not overflow
- ☐ Images scale correctly

9. Accessibility

- ☐ Sufficient color contrast
- ☐ Text is readable size, weight, and spacing
- ☐ Interactive elements are clearly identifiable
- ☐ Focus states are considered visible for keyboard users
- ☐ Form errors are understandable
- ☐ Images have appropriate alternative text noted for handoff
- ☐ Information is not communicated through color alone add icons or text

10. UX & Usability

- ☐ Primary action is obvious
- ☐ Navigation is understandable clear, familiar labels
- ☐ Important information is easy to find
- ☐ User feedback is provided loading, success, errors
- ☐ Error handling is clear
- ☐ User flow is simple
- ☐ Unnecessary steps are removed

11. Final Quality Check

- ☐ Design is visually consistent
- ☐ No alignment issues
- ☐ No spacing inconsistencies
- ☐ No spelling errors
- ☐ No broken components no detached instances
- ☐ Prototype interactions work
- ☐ All screens have been reviewed
- ☐ Design is ready for developer handoff
